ANNEX 3

Tandridge Local Committee

Members Highway Fund

Each Tandridge county member has an allocation of £7,500 to address highway issues in their divisions. The six county members have allocated £6,000 of their Member Highway Fund towards the provision of a Revenue Maintenance Gang in Tandridge. This funding provides each member with the gang for 4 weeks and 4 days in their division. Additional funding has been allocated to enable the gang to be procured for 42 weeks.

The gang started work on 7 May 2019 and is being used to respond to requests for work raised by residents both directly to members and also to the local area team. The gang will also be used to proactively react to issues identified by members and the local area team. It should be noted that priority is given to safety issues.

The gang's workload is being monitored by the Tandridge Maintenance Engineer and over the 42 week period will be spread equitably between the six divisions. A summary of the work carried out by the gang for the period May to October 2019 (26 weeks) is provided below.

The Maintenance Engineer has agreed with members what additional highway works they wish to carry out in their divisions with their remaining Member Highway Fund allocation. The type of works being funded includes the provision of grit bins, sign works, tree works, flailing and minor drainage works. It is also being used as a contribution towards the member's capital maintenance scheme where works exceeds the capital allocation.
