SPELTHORNE JOINT COMMITTEE
10 DECEMBER 2018

OPEN FORUM IN ADVANCE OF FORMAL MEETING
VERBAL PUBLIC QUESTIONS

Question 1: Mr Jim McIlroy, Chairman, Stanwell Moor Residents' Association
Mr McIlroy asked the Committee to play a short video showing HGVs manoeuvering in Stanwell Moor and asked for an indication from the Committee that action was being taken to progress with the installation of width restrictions as requested in his petition that was presented at the previous meeting.

Response
The Area Highways Officer stated that the feasibility study had started and that in his update to the Committee under Item 9 of the main agenda he was recommending that authority to act on the outcome of the study be delegated to him in consultation with the chairman, vice-chairman and Divisional member in order to avoid any unnecessary delays. It was pointed out that there was a risk attached to the study in that the cost of installation of a width restriction would not be known ahead of the setting of the Highways budget, and also that the study may find that there is no feasible and safe location for installation that allows HGVs (together with refuse lorries and emergency services vehicles) to execute a U-turn if necessary.

Question 2: Mr Malcolm Roberton
Mr Roberton asked for the legal justification behind the proposals to introduce charging for residents to dispose of timber, including kitchen units, at Community Recycling Centres in Surrey.

Response
The Chairman asked the Partnership Committee Officer to provide a written response.
