

**SURREY COUNTY COUNCIL'S
LOCAL COMMITTEE IN
EPSOM & EWELL
TRAFFIC MANAGEMENT ACT 2004
– STREET WORKS AND ROAD
WORKS**

9th OCTOBER 2006

KEY ISSUE:

To inform the Local Committee of the powers conferred by legislation, on Surrey County Council (SCC) to manage Street Works and Road Works.

SUMMARY:

The New Roads and Street Works Act 1991 (NRSWA) and the Traffic Management Act 2004 (TMA) indicate responsibilities for Local Transport Authorities, such as Surrey County Council. They also set out what sanctions can be applied for when co-ordinating Street Works and Road Works across the County. The NRSWA gave powers in relation to Street Works Undertakers. These are companies authorised to execute works associated with apparatus in a street. The TMA extends these powers to apply to Road Works Undertakers including the Surrey Highways Partnership.

1.0 INTRODUCTION AND BACKGROUND

- 1.1 The New Roads and Street Works Act 1991 (NRSWA) puts a Duty on Surrey County Council as the Local Transport Authority (LTA) to co-ordinate all Road Works and Street Works. It also places a duty on the works undertakers to co-operate. The Traffic Management Act 2004 (TMA) goes a step further by applying the Network Management Duty to each LTA and states:

“It is the duty of a local traffic authority to manage their road network with a view to achieving, so far as it may be reasonably practicable having regard to their other obligations, policies and objectives, the following objectives:

- a) securing the expeditious movement of traffic on the authority’s road network; and,
- b) facilitating the expeditious movement of traffic on road networks for which another authority is the traffic authority.”

- 1.2 The TMA has increased the sanctions, which the County Council can use through the NRSWA. The LTA, whilst having the duty to co-ordinate, can now direct a Utility to work at specific times and in specific locations should there be such a need. Any party in breach of the NRSWA can be prosecuted and face fines of up to £5,000.
- 1.3 A random sample selection of 30% of a Utility’s work programme is used to monitor the performance of that particular company on a quarterly basis. Whenever two consecutive quarter periods reveal an inspection failure rate of greater than 10% in either Signing, Lighting and Guarding, or physical acceptability set against intervention limits, an Improvement Notice will be served and a tightly controlled inspection regime instigated. The costs of the Improvement Notice regime will be recharged to the Undertaker of the works.
- 1.4 The ‘office’ activities are to receive all notices or applications advising the LTA of proposed works, to co-ordinate these with all other highway related works and produce a Street Works Register. In carrying out this function the ‘office’ must pay due regard to any possible conflict of works whilst at the same time check that the details submitted allow an accurate assessment to be made of where and for how long these activities will last. Where conflict or duration of works is considered a problem, a ‘Challenge’ is made directing a change in the proposals. A failure to supply correct information may be treated as a breach of NRSWA.
- 1.5 If works require a Traffic Regulation Order for a road closure then the standard procedure for achieving these is processed by Surrey County Council staff.

- 1.6 When changes occur to the duration of works a Notice must be sent advising of this. The reason why the change is made may be challenged and agreement reached on the new duration. If unexpected problems occur and measures are taken to amend the programme of works then agreement cannot be withheld unreasonably.

2.0 ANALYSIS AND COMMENTARY

- 2.1 The NRSWA and associated Codes of Practice detail how works are to be carried out from preliminary notification to final registration of completed works. The TMA has increased the LTA's powers enabling it to direct when and where, if applicable, works may be carried out (January 2005).
- 2.2 Under NRSWA there are a limited number of sanctions that can be applied against poor compliance, typically for incorrect Noticing, unsafe traffic management, failure to co-operate, undue delay and unreasonably prolonged works. Sanctions applied to date against Utilities' non-performance has been limited to the application of NRSWA Section 74. This provides for a charge to be applied for prolonged occupation of the highway. This also allows challenges to works durations when excessive time is requested or non-productive sites are discovered.
- 2.3 The quality of the final reinstatements has been monitored through a countywide coring investigation programme, which has revealed a poor level of compliance (currently 52%).
- 2.4 The TMA has proposed new ways to manage Street Works but with the proviso that Road Works are treated in exactly the same way. Legislation and Regulations were due to be published in 2004 but the DfT and Government have not met the deadline and now the earliest implementation date is considered to be 2007.
- 2.5 The DfT have recently published a consultation document outlining Intervention Criteria enabling the assessment of how well the LTA is meeting its Duty under TMA. Responses are due back 28th September and it appears each LTA will have to set its own performance indicators. A failure by the LTA to meet the strict requirements of any one of these indicators may cause the Secretary of State (SOS) to issue an Intervention Notice against that LTA. The SOS may also appoint a Traffic Director to 'improve' the LTA. All costs incurred would be recovered from that LTA.

- 2.6 Under the TMA, an LTA may operate a Permit Scheme, following successful submission and approval to the Secretary of State, whereby any activity on the highway must be subject to a Permit. The Permit Scheme will also allow for a charge to be made against the applicant, depending on the category of road in which the works takes place. At the moment, Surrey County Council has supplied a breakdown of estimated costs to DfT for information only and a decision on whether to proceed will be sought later.

CONCLUSIONS

Additional Regulations are expected in 2007. Further developments in managing the Street Works and Road Works in Surrey, in relation to this can be determined after that time.
