

**MINOR IMPROVEMENTS  
PROGRAMME REVIEW  
2005-2006**

**GUILDFORD LOCAL COMMITTEE**

**9<sup>th</sup> DECEMBER 2004**

**KEY ISSUE**

This report documents progress on the Minor Improvements programme over the past year and recommends a number of newly identified schemes for addition to the programme.

**SUMMARY**

The Transportation Task Group met on 1<sup>st</sup> October 2004 to consider new requests for minor improvements and to review the existing minor highway improvements programme. The recommendations of the Task Group are set out in the report.

## RECOMMENDATIONS

The Committee is asked to agree:

- (i) that the progress made in delivering the minor improvements programme since last year be noted, including the completed projects set out in **TABLE 1**.
- (ii) that the recommendations of the Transportation Task Group regarding new schemes put forward since last year be approved as set out in **TABLE 3**.
- (iii) that a number of schemes be deferred pending the outcome of other projects or developments, as set out in **TABLE 4**.

## INTRODUCTION

- 1 The Transportation Task Group met on the 1<sup>st</sup> October 2004 to review progress achieved on existing Minor Improvement Schemes and to consider new requests put forward since last year.
- 2 **TABLE 1** sets out details of those schemes that have been constructed since last year's update in November 2003.
- 3 **TABLE 2** shows details of schemes remaining in the programme agreed by the Committee last year.

## NEW REQUESTS

- 4 During last year, 8 potential new improvements were identified by Officers, Members, Parish Councils and residents. These are shown in **TABLE 3**. The Transportation Task Group received a detailed presentation on each of these, including photographs of each site and an assessment by officers of the opportunity each scheme provided to meet LTP objectives. The recommendations of the Task Group are incorporated in **TABLE 3**.

## DEFERRED SCHEMES

- 5 In November 2003 the Committee agreed to create a new category called 'Deferred Schemes', which could not be progressed immediately, but which Members did not wish to lose sight of. Reasons for these include the need to await completion of major developments, or the need to assess the effects of other highway proposals. These schemes have been extracted from the other Tables and are shown in **TABLE 4**.

**FINANCIAL IMPLICATIONS**

- 6 This report has no direct financial consequences, but identifies a programme of schemes, which must now be prioritised against a local strategy and funded as resources become available. The detailed financial implications will be set out in future reports, when the availability of funds and the estimated costs of individual schemes are known.

**SUSTAINABLE DEVELOPMENT IMPLICATIONS**

- 7 Each scheme has site-specific environmental & economic implications, which will be described in future reports as each project progresses.
