

# ASSET MANAGEMENT FOR THE HIGHWAY NETWORK

## SURREY COUNTY COUNCIL LOCAL COMMITTEE (GUILDFORD)

22<sup>nd</sup> MARCH 2007

### KEY ISSUE

Highway maintenance is an important function of the County Council, which impacts on all Surrey residents. To maximise the benefit from available funding, a sound asset management approach is being adopted. Historically highway works have been a combination of planned and reactive work. The intention is that with good management the amount of reactive work can be decreased.

### SUMMARY

A presentation is to be given by the Asset Management Group Manager. The presentation, copies of which are attached to this report, will include details on the drivers for change, revenue and capital funding arrangements, the need for customer focus and why and when we undertake highway maintenance.
