

Local Committee Capital & Revenue Spending Update for 2010/11

Surrey County Council Local Committee for Guildford

21st March 2012

Key Issue

This report provides an update on the projects funded from the Local Committee's Revenue & Capital allocation for 2010/11.

Summary

As part of the development of Local Committees, in 2010/11 the County Council provided revenue funds of £8,250 per Member and capital funds of £30,000 per committee to support voluntary or community groups. This report shows how projects have progressed towards achieving outcomes to enhance the 'social, economic and environmental well-being' of Guildford residents.

Recommendations

The Local Committee is asked

- i) to note this review of the Capital & Revenue allocations for 2010/11.
- ii) to comment on progress made and any concerns about delayed projects.

ITEM 7

1 INTRODUCTION AND BACKGROUND

1.1 For 2010/11, Surrey County Council allocated revenue funds of £8,250 per Member to be spent in ways that enhance the "economic, environmental or social well-being of the community". Ten members represent the borough of Guildford therefore that is a total of £82,500 for the Committee. In addition £49,722 of uncommitted revenue funding was carried forward from 2009/10.

Members propose the use of the funds but the Committee can decide, for example:

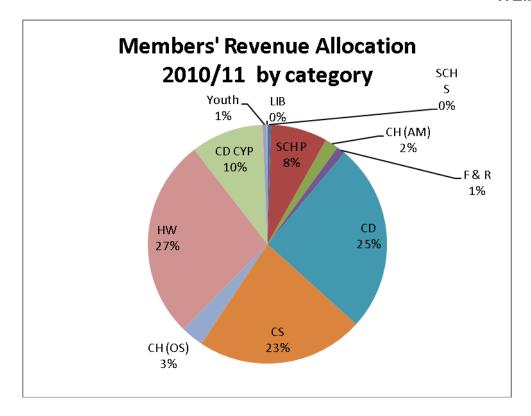

- That each Member spends their allocation on projects wholly within their division
- That the whole sum be spent on one or two projects agreed by the Committee as a whole to be prioritised, or
- That an agreed part of the total funding is allocated to individual projects within divisions and the remainder spent on a project agreed to be of priority to the Committee.
- 1.2 At the committee meeting held on 22nd September 2010 Members agreed that the capital pot, which totalled £30,000 be divided equally between the ten County Councillors, therefore £3,000 each.

2 ANALYSIS

2.1 In practice, Members have mainly chosen to spend both their capital and their revenue allocation wholly within their own division. In the main, Members work with communities to develop proposals for funding projects, although they have also considered ideas put forward by officers from individual services and organisations.

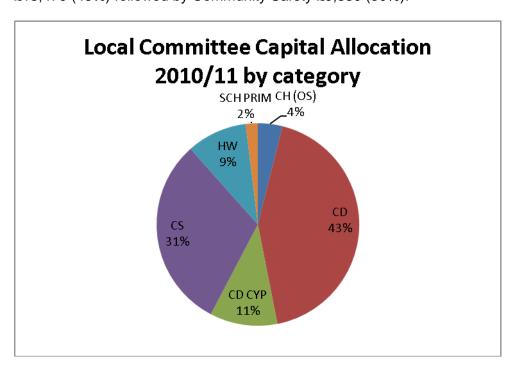

Revenue Funding

- 2.2 Annexe 1 shows the progress achieved by individual projects or, where Members' funds have contributed to fund-raising for larger schemes, identifiable steps and timescales on the way to delivering outcomes. This is part of the tracking to monitor that projects use the funds appropriately and the original objectives are being met.
- 2.3 The amount of revenue funding allocated to projects in 2010/11 was £136,723. This is made up of £49,722 carried forward from 2009/10, £77,349 committed from the 2010/11 budget and £9,652 returned from older projects, which was no longer required for a variety of reasons. £5,151 remained uncommitted at the end of 2010/11. Each of the projects, awarded funding, is categorised to assist with monitoring. As shown in the graph below the three largest categories to receive funding were SCC Highways with £37,110 (27%), Community Development £34,920(26%) and Community Safety £30,956 (23%).

Capital Funding

- 2.4 Annexe 2 shows the progress made by the projects which received capital funding in 2010/11.
- 2.5 The amount allocated was £30,000. A total of £32,150 was committed to projects from the capital allocation as there was £2,150 returned from older projects. As with the projects funded from the revenue allocation each of the projects is categorised to assist with the monitoring. As shown in the graph below the largest category to receive funding was Community Development £13,470 (43%) followed by Community Safety £9,880 (30%).

LIB	SCC Libraries

2.6 For both pots of funding most of the other strategic priorities or services of the County Council have been supported, to different degrees. However it should be noted that many projects could in reality be recorded under more than one category.

3 UPDATE ON PROJECTS FROM PREVIOUS YEARS

3.1 Projects funded by members' allocations in previous years, which are still ongoing continue to be monitored and updates requested as appropriate. Further information can be requested from the Community Partnerships Team West.

4 EQUALITY AND DIVERSITY IMPLICATIONS

4.1 All groups are able to apply for the funding equally. On a general basis the projects that were commissioned through the allocation funding were aimed at improving the lives of residents in the divisions.

5 COMMUNITY SAFETY IMPLICATIONS

5.1 Twenty three percent of the revenue funding and thirty percent of the capital funding have been allocated to community safety works, for projects that were commissioned by various groups. These projects have contributed to the work of these organisations to improve community safety in Guildford.

6 FINANCIAL IMPLICATIONS

6.1 All the projects were commissioned from within the budget set out for 2010/11, and there was no overspend.

7 REASONS FOR RECOMMENDATIONS

7.1 The Committee is asked to note the review and progress made, expressing any concerns as regards delayed projects, so that projects are monitored appropriately.
