

COMMUNITY PRIDE FUND

Surrey County Council's new £400,000 Community Pride Fund will pay for improvements to towns and villages across the county. Each county councillor will receive £5,000 for projects in their local area to improve the street scene and make a visible difference to the lives of the people they represent.

Local members know the needs of their communities best so they will get to decide how the money is spent.

How will members bid for work?

1. Each local committee will receive a report in the summer. Following this, £5,000 will be delegated to each county councillor to spend throughout the year. If members want to work together to fund a larger scheme, they can pool their funds with the agreement of their area team manager.
2. After this, members will be asked quarterly if they have any work they would like to fund. Maintenance engineers and members will then work closely to ensure that the work:
 - Delivers value for money and are highway related
 - Can be delivered safely
 - Is fully costed and programmed
3. A summary of costs for works can be found below ranging from an installation of a new bollard to footway patching etc. Costs are made on the basis that the jobs can be completed within three months, weather permitting.
4. All members will receive a quarterly statement showing how much they have spent to date and they will be kept up to date with progress through the fortnightly work bulletin.

Further information

Please contact your local maintenance engineer to discuss any specific issues.

Price is exclusive of any specific machine tools.	£450.00	Full Day

Excluded Costs

The costs above below are excluded from price list above. Your Maintenance Engineer will confirm if any additional costs will apply:

- **Traffic management costs** - any works which will directly disrupt traffic on roads exceeding 40mph may require traffic management restrictions (e.g. temporary traffic signals). Your Maintenance Engineer will advise of any additional cost.
- **Design costs** - all feasibility costs are included in rates below. However, work requiring new road design via CAD etc will be subject to additional cost.
