### Notes:

- 1) The mean utilisation is the average number of vehicles parked at any one time
- 2) The maximum utilisation is the maximum number of vehicles parked at any one time
- 3) The parking capacity is the notional number of parking spaces available, and has been estimated assuming that each parked vehicles occupies 4.2m of road space
- 4) It is possible for the utilisation percentage to be greater than 100% as some shorter vehicles occupy less than 4.2m of road space
