

**LOCAL TRANSPORTATION SERVICE
CURRENT STATUS OF PROJECTS**

**LOCAL COMMITTEE FOR WOKING
22 OCTOBER 2003**

KEY ISSUE:

To ensure Members of the Local Committee are aware of the current status of projects within the Local Transportation Service.

SUMMARY:

This report details the current status of various work programmes from enquiry to completion.

CONSULTATIONS:

No specific consultations have taken place for this status report except where “No action proposed” has been stated against items in Appendix A.

In this instance the views of County Councillors and Borough Ward Members is being sought and will be reported orally at the meeting.

OFFICER RECOMMENDATIONS:

The Committee is asked to:

- (i) agree the actions stated against the work programme shown in Appendix A and**
- (ii) note the current status of the work programmes reported in Appendices B to F.**

INTRODUCTION and BACKGROUND

- 1 This report is written to inform Members of the Local Committee of the current status of work programmes being undertaken by the Local Transportation Service.

ANALYSIS AND COMMENTARY

- 2 The work programmes have been considered on the following basis:
 - Items not covered by Members allocation, local allocation, Local Transport Plan or revenue maintenance budget (Appendix A)
 - Local Transport Plan programme for integrated transport (Appendix B)
 - Major maintenance (Local Transport Plan funded) (Appendix C)
 - Local Capital Allocation (Appendix D)
 - Members Allocation (Appendix E)
 - Revenue funded highway maintenance (Appendix F)
- 3 Appendix A details those work items not covered by 2003-04 budget provision through Members Allocation, Local Capital Allocation, Local Transport Plan or revenue maintenance budget. Each work item has a reference number and the current position is stated. All project proposals have been received and Members are asked to particularly review the categories “No action proposed” and “To be programmed”.

If “No action proposed” is agreed the work item will be deleted from the list. Where “To be programmed” is used a timescale has been proposed and agreement by Members will be deemed to accept this as stated.
- 4 Appendix B summarises the current status of schemes on the Local Transport Plan programme for integrated transport.
- 5 Appendix C summarises the current status of Local Transport Plan funded major maintenance schemes.
- 6 Appendix D summarises the current status of schemes/work funded through Local Capital Allocation.
- 7 Appendix E summarises the current status of schemes/work funded through Members Allocation.
- 8 Appendix F summarises the current status of highway maintenance work funded through revenue.

FINANCIAL/SUSTAINABLE DEVELOPMENT/CRIME & DISORDER/ EQUALITIES IMPLICATIONS

- 9 These are covered in other general and project specific reports to Committee.

CONCLUSIONS AND REASONS FOR RECOMMENDATIONS

- 10 Work items have been raised/requested by various parties and included on a list for future consideration. Appendix A details the current status of work items within the Local Transportation Service not covered by Appendices B to F. The Local Committee is asked to agree the actions stated against the work programme so as to manage the expectations of Members and public alike that having raised an issue it will become programmed work. Resources do not permit the Local Transportation Service to investigate and resolve every issue raised to the satisfaction of everyone concerned. The purpose of bringing this item to Committee and seeking agreement to the actions proposed is to clarify the work programme of the Local Transportation Service ensuring that it concentrates on those items that are deemed a local priority.
- 11 Appendices B to F are for information and relate to work programmes previously submitted to Committee and referenced in background papers.

Report by: Stephen Child, Local Transportation Director

LEAD/CONTACT OFFICER: Stephen Child

TELEPHONE NUMBER: 01483 518300
