A [Back to Accounting Definitions](#)

Accounting Period

The length of time covered by the accounts. In the case of these accounts, it is the year from 1 April to 31 March.

Accrual Basis

The accruals principle is that income is recorded when it is earned rather than when it is received, and expenses are recorded when goods or services are received rather than when the payment is made.

Accrued Expense

Expenses that have been incurred but not yet paid.

Accrued Revenues

Revenues that have been earned but not yet received.

Actuarial Gains and Losses

Changes in the estimated value of the pension fund because events have not coincided with the actuarial assumptions made or the assumptions themselves have changed.

Actuarial Valuation

A three yearly valuation of the Fund undertaken by the Actuary to ensure that the Pension Fund is sufficiently well managed and that its assets meet its liabilities. Employer contribution rates are set as part of the valuation process.

Actuary

A professionally qualified independent person appointed by the administering authority in order to value the Pension Fund and therefore set contribution rates.

Amortisation

A measure of the cost of economic benefits derived from intangible assets that are consumed during the period.

Asset

Any resource owned by an entity that has economic value and is expected to provide future benefits.

Audit

An independent examination of an organisation's financial statements and related operations to ensure accuracy and compliance with applicable laws and regulations.

B Back to Accounting Definitions**Balance Sheet**

A financial statement that shows an organisation's assets, liabilities, and equity at a specific point in time.

Balances

These represent the accumulated surplus of revenue income over expenditure.

Book Value

The value of an asset as it appears on the balance sheet, calculated as the asset's original cost minus accumulated depreciation.

Budget

An expression, mainly in financial terms, of the Authority's intended income and expenditure to carry out its objectives.

C Back to Accounting Definitions**Capital Adjustment Account**

The Account accumulates (on the debit side) the write-down of the historical cost of non-current assets as they are consumed by depreciation and impairments or written off on disposal. It accumulates (on the credit side) the resources that have been set aside to finance Capital expenditure. The balance on the account thus represents timing differences between the amount of the historical cost of non-current assets that has been consumed and the amount that has been financed in accordance with statutory requirements.

Capital

Financial assets or the financial value of assets such as cash, equipment, and property.

Capital Expenditure

Payments for the acquisition, construction, enhancement, or replacement of non-current assets that will be of use or benefit to the Authority in providing its services for more than one year.

Cash Equivalents

Short term, highly liquid investments readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value.

Cash Flow Statement

A financial statement that shows the cash inflows and outflows from operating, investing, and financing activities.

Chartered Institute of Public Finance and Accountancy (CIPFA)

CIPFA is the main professional body for accountants working in public services.

Contingent Liability

A contingent liability is either:

- A possible obligation arising from a past event whose existence will be confirmed by the occurrence of one or more uncertain future events not wholly within the control of the Authority; or
- A present obligation arising from past events where it is not probable that there will be an associated cost, or the amount of the obligation cannot be accurately measured.

Creditors

Amounts owed by the Authority for work done, goods received, or services rendered, for which payment has not been made at the balance sheet date.

Current Service Cost

Current Service Cost is the increase in the present value of a defined benefit pension scheme's liabilities expected to arise from employee service in the current period, i.e. the ultimate pension benefits "earned" by employees in the current year's employment.

D [Back to Accounting Definitions](#)

Debit

An entry that represents an increase in assets and a decrease in liabilities or equity. It represents the ownership interest.

Debtors

Amounts due to the Authority that have not been received at the balance sheet date.

Depreciation

The measure of the consumption, wearing out or other reduction in the useful economic life of non-current assets that has been consumed in the period.

E Back to Accounting Definitions

Employee Benefits

Amounts due to employees including salaries, paid annual leave, paid sick leave, and bonuses. These also include the cost of employer's national insurance contributions paid on these benefits, and the cost of post-employment benefits, i.e. pensions.

Equity

The residual interest in the assets of an entity after deducting liabilities. It represents the ownership interest.

Expected Rate of Return on Pensions Assets

The average rate of return, including both income and changes in fair value but net of scheme expenses, expected over the remaining life of the related obligation on the actual assets held by the pension scheme.

F Back to Accounting Definitions

Fair Value

The amount for which an asset could be exchanged, or a liability settled, in an orderly transaction between market participants at the measurement date.

Fair Value Hierarchy and Inputs

In measuring fair value of assets and liabilities, the valuation technique used is categorised according to the extent of observable data that is available to estimate the fair value – this is known as the fair value hierarchy. Observable inputs refers to publicly available information about actual transactions and events in the market. Unobservable inputs are used where no market data is available and are developed using the best information available. The fair value hierarchy has three levels of inputs: Level 1: Quoted prices for identical items in an active market – i.e. the actual price for which the asset or liability is sold; Level 2: Other significant observable inputs – i.e. actual prices for which similar assets or liabilities have been sold; Level 3: Unobservable inputs – i.e. where market data is not available and other information is used in order to arrive at a best estimate of fair value.

Financial Accounting

The branch of accounting focused on recording summarizing and reporting an organisation's financial transactions to external users.

Financial Instrument

Any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another. The term covers both financial assets and financial liabilities, from straightforward trade receivables (invoices owing) and trade payables (invoices owed) to complex derivatives and embedded derivatives.

Financial Ratios

Metrics used to evaluate a company's financial performance and Liquidity such as current ratio, debt to equity ratio, and return on equity.

G [Back to Accounting Definitions](#)

General Fund

The main revenue fund of the Authority which is used to meet the cost of services paid for from the Pension Fund for which the Authority is the administering authority.

General Ledger

A complete record of all financial transactions of a business organised by accounts.

Goodwill

The excess of the purchase price of a business over the fair value of its identifiable assets and liabilities.

I [Back to Accounting Definitions](#)

Income Statement

A financial statement that shows an organisation revenues, expenses and net income or loss over a specific period.

Intangible Assets

Assets that do not have physical substance but are identifiable and controlled by the Authority. Examples include software and licences.

Interest Cost

For defined benefit pension schemes, the interest cost is the present value of the liabilities during the year as a result of moving one year closer to being paid.

J [Back to Accounting Definitions](#)

Journal Entry

The recording of a financial transaction in the accounting system.

Journal

The record where all financial transactions are initially recorded before they are posted to ledger accounts.

L [Back to Accounting Definitions](#)

Leasing

A method of acquiring the use of capital assets for a specified period for which a rental charge is paid.

Liability

An amount due to individuals or organisations which will have to be paid at some time in the future. Current liabilities are those that are payable within one year of the balance sheet date.

N [Back to Accounting Definitions](#)

Net Book Value

The amount at which fixed assets are included in the balance sheet, i.e. their historical cost or current value, less the cumulative amount provided for depreciation.

Non-Current Asset

An item that yields benefit to the Authority for a period of more than one year.

O [Back to Accounting Definitions](#)

Operating Expenses

Expenses incurred in the ordinary course of business such as rent, salaries and utilities.

Overhead

The indirect costs of running a business such as administrative expense and utilities.

P [Back to Accounting Definitions](#)

Past Service Cost

Past service costs arise from decisions taken in the current year but whose financial effect is derived from service earned in earlier years.

Prepaid Expenses

Expenses paid in advance which will be recognised as expense in future accounting periods.

R [Back to Accounting Definitions](#)

Reserves

The residual interest in the assets of the Authority after deducting all of its liabilities. These are split into two categories, usable and unusable. Usable reserves are those reserves that contain resources that an authority can apply to fund expenditure of either a revenue or capital nature (as defined). Unusable reserves are those that an

authority is not able to utilise to provide services. They hold timing differences between expenditure being incurred and its financing e.g. Capital Adjustment Account.

Retained Earnings

The cumulative earnings of a company that have not been distributed to shareholders as dividends.

Revenue Expenditure

Spending incurred on the day-to-day running of the Authority. This mainly includes employee costs and general running expenses.

S [Back to Accounting Definitions](#)

Statement of Retained Earnings

A financial statement that shows the changes in retained earnings over a specific period, including net income, dividends and prior period adjustments.

T [Back to Accounting Definitions](#)

Tax Accounting

The branch of accounting focused on calculating and managing taxes owed by an organisation to governmental agencies.

Trial Balance

A list of all the account balances in the ledger to check the accuracy of the debits and credits

U [Back to Accounting Definitions](#)

Useful Economic Life

The period over which the Authority expects to derive benefit from non-current assets.

W [Back to Accounting Definitions](#)

Write off

The difference between current assets and current liabilities representing the short-term financial health of a business.

Working Capital

The difference between current assets and current liabilities, representing the short-term financial health of a business.
