Request for clearway restrictions for an existing bus stop on Hook Road Epsom

Location: Existing bus stop adjacent to properties 132-138 Hook Road Epsom

Problem: Buses are unable to pull into the kerb due to inconsiderate parking at certain times of the day. This results in passengers having to board and alight in the carriageway.

Proposal: To modify (lengthen) the bus stop cage to comply with TSRGD diagram 1025.1 and introduce a 'bus stop clearway' giving the buses uninterrupted access to the boarding area.

The times of restriction to be **no stopping at anytime** which is appropriate to the operating times of the bus service (this follows Department of Transport guidance for introducing bus stop clearways).

Following committee approval, a letter drop will be undertaken to any directly affected frontages advising of the new restriction prior to the cage being marked out.
