Annex 2 Technical Notes relating to Pupil Premium and Prior Attainment Band performance data

Our aim is to use data that is readily available in the public domain from official sources where ever possible. School level data for the performance of Pupil Premium groups and Prior Attainment bandings was part of the official data set published by the DfE alongside the Performance Tables and this was used to produce figures for the Local Committee reports.

However, the Department of Education has a strict policy on the publication of small numbers, which states:

[They will] suppress publication of figures relating to a cohort of 5 pupils or fewer. This is intended to reduce the risk of individual pupils being identified from published data. In the 2012 Performance Tables:

- We will suppress publication of all figures relating to a cohort of 5 pupils or fewer; and;
- We will suppress publication of figures relating to the characteristics of pupils (SEN, Free School Meals etc) where there are fewer than 6 of the pupils in the group. For example, if there are four pupils not eligible for FSM in the schools, all indicators for eligibility for free school meals will be suppressed.

As a result the performance figures for a number of schools in the Local Committee reports were suppressed.

More detailed calculations based on individual pupil level data provided to the Local Authority were not possible due to the limited time between publication and the Local Committee report deadlines.
