

<b>Surrey County Council Action</b>	<b>Action with partners and communities</b>
<ol style="list-style-type: none"> <li>1. Ensure climate change is at the centre of the work we do through organisation-wide integration of climate change practices supported through training and engagement.</li> <li>2. Be zero carbon across our organisational emissions by 2030.</li> <li>3. All SCC's electricity delivered through a green energy supplier by 2020. Switch energy suppliers to a green tariff for gas.</li> <li>4. Ensure the council's vehicle fleet will be zero emissions in the medium term.</li> <li>5. Introduce a zero emission bus fleet across Surrey by 2030</li> <li>6. We will use our procurement practices and influence across our supply chain to require and incentivise environmentally responsible commissioning</li> <li>7. Work with pension funds and other investors to divest from fossil fuels and increase investment in energy efficiency, renewable energy, low carbon transport and low carbon heat solutions.</li> <li>8. Work with staff to drive behavioural changes that help reduce business emissions, for example, reducing mileage travelled in private transport.</li> </ol>	<ol style="list-style-type: none"> <li>9. Commit to set long term targets (five-years) to reduce both the County's Scope 1, and 2 emissions, and measure and report on these annually</li> <li>10. Commit to measure and report Scope 3 emissions annually, with an ambition to consider approaches to reduce or offset.</li> <li>11. Establish effective engagement practices to ensure our strategy is co-designed and delivered with partners, businesses and residents across Surrey.</li> <li>12. Continue to push for national level action to redirect investments and introduce market mechanisms that deliver changes that avoid negative outcomes for residents and help to support informed choices</li> <li>13. Improve our communications and engagement on climate change to support ongoing changes in resident behaviour e.g. travel choices, dietary choices and build public acceptance</li> <li>14. Improve public transport links and active travel infrastructure to reduce car use.</li> <li>15. Further develop our EV strategy to enable electric transport with infrastructure and incentives</li> <li>16. Work towards all new developments being zero carbon and leaving the natural environment and biodiversity in a better state than before.</li> <li>17. Develop a land-use strategy for Surrey focused on increasing green spaces, woodland cover in line with national targets and sustainable farming practices.</li> <li>18. Develop our approach to engaging residents and businesses to refocus on reducing consumption and production of waste as a priority, supported by increased reuse and recycling.</li> </ol>
