<p>February 2020</p>	<p>Police And Crime Commissioner's Proposed Precept 2020/21</p>	<p>R2/20: The PCC to provide more detail on how the precept and future strategic measures by police forces nationally would affect Surrey Police performance through the numbers of crimes solved and prevented.</p>	<p>PCC</p>	<p>Included in item 10, section 2.3. More Crimes Solved, in June's agenda.</p> <p>It is not possible to predict in detail the effect on performance of numbers of crimes solved and prevented. These can be affected by a number of factors including unemployment levels, rates of reporting, levels of deprivation, crime types changing, policing resources and partner resources (such as social services and the wider criminal justice system). Currently policing resources are being brought back up to levels seen 10 years ago and will take a few years for all recruitment and training to have taken place. However, with resources being placed across policing activity it is hoped that there will be greater crime prevention across all crime types in the long term. This should be reflected in the Crime Survey of England and Wales which provides the best measure of crime levels as increased police activity could increase police recorded crime statistics. For example, recorded drug offences tend to correlate highly with police operations carried out.</p> <p>Numbers of crimes solved should also increase – particularly in areas where increased police activity can quickly affect crime solve rates such as burglary. For more complex cases such as child abuse, domestic abuse and sexual offences, the whole criminal justice system will need to see a change in order for solve rates to improve – for example at the moment the CPS does not take many cases forward where victims don't support action which is a significant percentage of cases.</p> <p>The Government is currently looking at outcome measures and the OPCC will share these with the Panel once more detail is known.</p>	<p>June 2020</p>

February 2020	Police And Crime Commissioner's Proposed Precept 2020/21	R4/20: The PCC to provide detailed figures on the retention rate and how it would be improved, considering the net difference between incoming recruits and leavers from the force.	PCC	<p>The rate of leavers is included in the Appendix A: Force Balanced Scorecard within item 15, in June's agenda.</p> <p>The current unplanned retention rates are shown in the scorecard provided to the Police and Crime Panel. Total leaver rates for police officers in Surrey are the third highest in England and Wales at 9.3% in 2018/19 (as published by HMICFRS). The biggest reasons for leaving are transfer to other forces (3.1%), voluntary resignation (2.8%) and retirement 2.5%. This high level does represent a challenge for Surrey Police and means that more recruits are needed to achieve the overall increased workforce targets. Surrey Police HR have carried out detailed analysis for reasons for leaving. These include:</p> <ul style="list-style-type: none"> • High cost of living and housing in Surrey • Move to other force e.g. Metropolitan Police to tackle different types of crime • Move to other forces to be nearer family/ home force (as other forces have not been recruiting for a number of years, when they start to recruit again this opens up the option of transfer back to a home force) • Work-life balance/ job stress <p>A great deal of work is being done by Surrey Police to mitigate these factors wherever possible including looking at housing schemes, promoting the positive culture in Surrey Police, carrying out detailed exit interviews and employee surveys to identify stress factors and action plans to address them.</p> <p>Surrey Police has also been successful in recruiting transferees into the force, particularly detectives.</p>	June 2020
