

SURREY POLICE AND CRIME PANEL – 26 SEPTEMBER 2024**PROCEDURAL MATTERS – PUBLIC QUESTIONS AND RESPONSES****1. Question submitted by Cllr Ashley Tilling**

Q: The DISC system is a crime and anti-social behaviour reporting tool that many police forces use around the country. There has been a marked increase in theft from shops and more anti-social behaviour being reported in and around our high streets. The reporting system enables retail & hospitality owners to easily log incidents which are then readily available to the police not only to determine action necessary but also to compile a database of offenders for prosecution.

The thirteen Business Improvement Districts (BIDs) in Surrey have requested that Surrey Police install a direct reporting link from their DISC systems so that a true level of incidents are reported and readily actioned.

Firstly, are Surrey Police able to commit to meeting this request?

Secondly, in other authorities the PCC has funded DISC to ensure every town and village that experiences crime and ASB can use the system. Will this be funded in Surrey?

Police & Crime Commissioner Response:

Not yet received.
